

DECKZ

DECKING RANGE

A REVOLUTION IN OUTDOOR FLOORING

As an alternative to natural wood decking, Deckz offers a solution that is environmentally friendly, sustainable, and safe, but without the flaws and setbacks of natural wood products. Made from a unique solid-composite grain technology, it is incredibly strong, durable, and long lasting.

With no need to stain, paint, or treat, Deckz is low-maintenance. Plus, with a wide range of finishes and designs, you're sure to find the perfect complement to your outdoor haven. Just select your desired finish, and this ready to install composite solution can be the final touch to your ideal outdoor space.

WHAT IS DECKZ MADE OF?

Deckz is a composite of 25 recycled, raw materials. It has been meticulously designed to produce a durable, sturdy, weather and stain-resistant product that's helpful, not harmful, to the environment.

Each and every one of Deckz' components has been purposefully chosen. Its predominant material is poplar tree wood fibres that have been grown in North America, selected for their particularly hard-wearing qualities and strength in extreme weather conditions.

Recycled, refined Polyethylene also makes up a large part of the composition, helping to both reduce Deckz carbon footprint, while also retaining and enhancing its stability and resilience.

The remaining unique compounds have been selected to help contribute to the hard-wearing, unyielding nature of Deckz.

WHY DECKZ IS DIFFERENT?

Designed in consultancy with working carpenters, DECKZ is a workforce-friendly product, that's easy to install and beautiful to the eye.

- It arrives in two pre-cut lengths, for ease of installation (3.6m and 4.8m).
- Every board is consistently made to the same dimensions.
- Perfectly fitted to mount on 400mm joist centres; the industry standard worldwide.
- Will not rot or warp like wood.
- 15 year warranty.

Reversible boards, that give you the control to customise the final look.

Splinter-free, slip-resistant surface.

Stain-resistant and easy to clean

Deckz board can be sanded

While standard composite decking has a film-wrapped veneer which, when damaged stays damaged, Deckz is solid composite, meaning any scratches or damage can be sanded down, restoring your boards to their original beauty.

ARTEM DECKING

While every Artem board is identical in shape and size, each one is designed to be elegantly different.

Our 3D embossed range, Artem is made using advanced extrusion technology. It incorporates multi-colour additions, randomised grain textures, and colour patterns to create the most realistic engineered effect. So, while each board is meticulously made to the same size specification, no design is duplicated. Artem mimics the beautiful random pattern of real wood pieces, without the flaws and setbacks of using real wood pieces. Artem can even be lightly sanded, meaning that if it is damaged or scratched over time, it can be restored to that beautiful, natural, weathered effect.

Artem: A durable, natural, timeless aesthetic.

FORTIZ DECKING

Beautiful, strong, durable. A robust composite structure, and deep-grooved surface designs makes Fortiz about strength and durability, while still being an unmistakably sharp decking option.

Fortiz is hard-wearing, with sturdiness and durability at the core of its design. Distinct, high-grip groove patterns on each side of the boards guarantee stability, while also offering complete control over the aesthetic, without compromise. These grooves are uniquely developed in another way: when used with CLIPZ, Fortiz boards create a perfect ridge pattern. Correctly fitted they line up perfectly, with exact and precise spacing between each and every board; a precise design making for a precise finish.

Fortiz: Strength and beauty in precision.

MODERNO DECKING

Less is more. Moderno offers sleek reflections of an urban environment, all while retaining the natural beauty and adaptability of wood.

Moderno's boards are designed wider than than any others in the Deckz range, reducing both the time it takes to install and the amount of Clipz needed. Crafted with two grey-tone colours through each and every board, Moderno can be deeply sanded if required to remove scratches and dents, or simply to adjust the aesthetic closer to the image you have of your ideal space. While minimal is key in the way in which Moderno has been designed, each board is reversible, offering two very different effects: smooth and marbled, or a bold, high grip triple-grooved effect.

Moderno: Bold, Urban design with a minimalist edge.

CLIPZ

Made in the UK from durable, 100% recycled materials, they are purposefully designed to fit perfectly and near-invisibly with all Deckz decking.

While Clipz are made to universal specifications, and can therefore be used with other decking manufacturers, they have been streamlined to work with Deckz in a specific way.

Each Deckz board has a 6mm groove along its side, into which Clipz fit perfectly. The 6mm overhang also allow Clipz to be used to tie edging boards in. So, not only do they hold the boards side-by-side, but also at a 90° angle too. Clipz are available in 3 colours (brown, grey and black) so they can work seamlessly with whatever design has caught your eye.

BROWN

GREY

BLACK

Colours may vary.
An exact match with your decking is not necessary.

How many clips will I need?

Typically, you will require a clip on each joist, the standard distance for which is 400mm. Therefore, you will need roughly 10 Clipz per 3.6 metre board, or 13 per 4.8 metre board.

Clipz are sold in packs of 100 and include screws.

£19.99 per pack

DESIGN AND INSTALLATION

We have a trained, in-house design team ready to help you plan, and execute your installation. The deck design plans we have available include step-by-step instructions, which provide piece of mind for you and your contractor. They enable you to communicate your exact vision for your space, giving you more control in the process and outcome. Our plans and design team will equip you or your contractor with the know-how to successfully install Deckz.

Do you have a query about our product range, or would you like to arrange a consultation?

Move one step closer to your perfect outdoor space, and contact us on 0800 002 9887.

Colours may vary. We recommend requesting samples to ensure you're entirely happy before committing to an order.

www.deckz.co

A modern outdoor deck at night. The deck is made of dark, horizontally-slatted wood. To the left, there is a wall made of light-colored, textured stone blocks. A glass railing with a dark frame runs along the edge of the deck. The background is a dark, starry night sky. The overall atmosphere is serene and contemporary.
